

Ben Simonoff

1409 Utah St, Apt A • Golden, CO 80401 • simonoffben@gmail.com • 719-330-9424

Education

Colorado School of Mines – Golden, CO	May 2026
Bachelor of Science in Chemical Engineering	GPA: 3.64

Employment

Bhate Environmental Associates Inc. – Lakewood, CO	May 2024 - Aug 2024
- Supported environmental remediation projects on military installations, including groundwater and soil vapor contamination assessment using dual-phase extraction (DPE) systems for petroleum hydrocarbons and vinyl chlorides - Monitored performance of DPE systems, including interpretation of extraction rates and contaminant concentration trends - Analyzed chemicals and prepared technical reports for submission to the EPA - Caught instances of missing/inaccurate samples, saving company money and trouble	

Engineering Experience

Senior Capstone Design – Ammonia Synthesis Facility

- Designed a conceptual ammonia synthesis plant under realistic operating, safety, and economic constraints
- Modeled reactor physics to optimize reaction kinetics and mass transport phenomena
- Evaluated different designs – performing economic analysis including capital and operating cost estimation to assess design feasibility

Report Automation Project – Bhate Environmental Associates

- Automated compilation of historical environmental data into standardized reporting formats
- Improved clarity and consistency of EPA-facing documentation through collaboration with senior engineers

Chemical Engineering Field Session

- Analyzed real-world chemical engineering processes and operational constraints
- Delivered technical reports and formal oral presentations

Leadership and Service

Service Event Coordinator	October 2025
- Led ~80 people in service event to help elderly around the town - Organized/supported 8 different project sites with varying needs - Brought large improvements to 5 houses, a church, a park, and a community trail	
Mines Undergraduate Student Government	April 2025-Present

Skills

Process Simulation & Design: MATLAB, Aspen Plus (V11), Aspen HYSYS, AutoCAD, SolidWorks (CSWA)
Programming & Data: Python, Excel (data analysis, automation), Polymath Professional, HTML/CSS
Engineering Methods: Process modeling, technical & field sketching, system design iteration
Communication: Technical reports, formal presentations, French seal of biliteracy, digital art
